

Web Application Presentation

Student Name: Dimitri Shostakovich

Web Application: Soshiku

Grade Breakdown:

Reflection Statement:	8 / 10
Providing Feedback:	4 / 5
Presentation Preparation:	5 / 5
Presentation Delivery:	8 / 10
Presentation Organization:	4 / 5
Content Knowledge:	10 / 10
Feedback from others:	4.2/ 5
Total:	43.8 / 50

Teacher Comments:

You were a bit repetitive to begin with, saying "it's really cool" several times. After you got settled in, however, you did well, telling jokes, and you seemed comfortable. Good job connecting what you're talking about to something your students may already know about (facebook friends).

You handled questions well.

Your organization seemed to suffer by talking about things in a different order than you prepared. This is one of the risks of public speaking, and you recovered well.

Student Feedback (unedited and anonymized)

1) What is one good thing about the presentation?

i liked that the web application is relevant to our daily lives as students1 we have so many things going on, and since we are technology saavy, its an easy way to use a planner instead of having to write down everything.

I think it was good that you went through and showed us how to sign up.

It's really cool because its an online homework planner. It can really help you keep track of your assignments and will also notify you if you have something either due or overdue.

I liked how you explained how to register for the website, but you also had your own account, so you were able to show us everything that the website offered. You explained everything well and went through everything step by step.

Amber really knew and understood how the web application worked and thoroughly explained to the class how to add a new account and how to add courses, assignments and how to involve partners to the assignments.

I liked that she is taking the time to show us how to add a course, and how to add an assignment. She already had an account, which showed she uses the web application.

Good knowledge of the website and good demonstration on how to use the website.

This is a good way for us to learn to use this program. She was able to go into different aspects of the website. She seemed to know a lot about it. She was able to answer the majority of the questions we had.

I like how you walked through the whole process and made it very straightforward

I like it that you can go to just one place to look up all the things that need to be done. I also like the group part of it too so you won't have to set up appointments with group members you can just go on the website.

Soshiku - Helps you keep up with the dates your homework is due.

I like the concept that it's an online planner....no wasting paper!! It also comes in handy to have other people on a group project. The alert is also really cool.

We now have a free choice of planner online. A new way of cooperation

She seemed like she really knew what she was talking about with this site. She took the time to figure it out so she could explain it to the class easily and effectively. This was a cool app that helps you track your homework and assignments online. I also liked the enthusiasm in her voice. She was very easy to understand and spoke in a good tone of voice.

Very informative presentation. Wasn't aware of the website prior to the presentation.

2) What is one thing the presenter could improve upon?

just a slight work on presentation skills

Maybe just that she could have showed us a little more visual parts of the site. She told us about what it could potentially do with tracking assignments, but you didn't really see it too much in action. Overall though, I believe she did really good.

The whole presentation can be more organized

I thought it was ok, just a little unorganized but was fine

Could work a little on organization of thoughts. Should have written down each major advantage of the site.

I thought she did a good job. She explained everything that was helpful

You seemed excited about the presentation but you yawned during the whole thing which could make the professor think that you really didn't care about the assignment. Drink coffee lol

Think of a way in which we could use it in our classroom. Go into more detail in which we could use this later for school

The usage of "um" and "like" could be improved upon. Should maybe stop yawning while giving a presentation, lol.

A set up of how she is going to talk to us about the web application. SHE seems a little unorganized, which could be from nerves.

I thought Amber did a great job throughout the entire presentation I really got a great feel for how the web application works!

I think you could have had your information more organized, like how you explained it step by step. Not just move around through the website.

I thought you did a great job.

Make the transitions a little better sometimes it seemed like you were just reading straight from it.

she could have went further into how to set up the account just in case someone really didnt know how to use it. we saw mainly a finished product.

3) After viewing this presentation, would you feel comfortable using the web application presented?

From her directions, no, but the web application seems easy enough to understand.

Yeah I think it looks like an interesting website.

Yes I would feel very comfortable using this web application. She did a great job showing how to use it.

Yes, i think it sounds like a very useful website and it is another way to help you keep up with your assignments.

I feel very comfortable with the knowledge presented about the web application and definitely think I can use this website for my school assignments and exam information!

I would feel like checking it out, but I wouldn't feel comfortable having another website to maintain with all of the others.

Yes, I would feel comfortable about using the web app after seeing it demonstrated.

Yes.

Yes, I think you explained it well.

Yes, deffinatly

I will not use this site because I do not need anything to let me know when an assignment is due. This site would just bug me.

I would feel comfortable using but i think it depends on the person some are really into using the internet for everything but I like to use the old pen and planner book.

Not really, I am not used to use a planner even though it's online.

Yes, I believe so. I feel rather comfortable using sites like this, but Amber even made it a lot easier to see what it's about and made me potentially want to use this site for my own assignments.

I've already signed up for the service. Seems to be very easy to work with.

4) General Comments

I'm glad she chose this website.

Overall, great job. I liked her enthusiasm of her presentation.

No general comments, it's a real fine and plain presentation

It was a really cool idea

Please see the above comments. Also I guess it is really a good idea for people who can really benefit from this service.

I would try to use the website and see how I like it

Very good presentation overall and you detailed it nicely.

I liked the presentation, she could have been more organized

I like how excited and informed she was with the web application tools and think it is really cool that you can text information to your profile!

You did a good job explaining the website and showing us exactly how to do things.

I thought you did a great job and picked an awesome web application that would be beneficial to all of us.

Good overall presentation

her projection was nice. Language was clear and easy to understand. she seems comfortable in front of everyone and with the web application she chose.

Average Peer Review Score: 4.2 / 5
